

## Index of Authors of Publications Reviewed and Abstracted in Volumes 1-13

*Prepared by* ALBERT C. LEWIS

A reference consists of a volume number in boldface followed by page numbers. R indicates a review. A number in parentheses indicates the number of abstracts on the page.

There are inconsistencies in the abstracts, as one might expect over a thirteen-year period. In spite of an effort to be consistent in this index, an author may still be represented by more than one form of name. This caveat holds especially for transliterations of Cyrillic originals.
